SUBJECT: Volume I (Executive Summary), Assessment of the Study of Army Logistics - 1981

SEE DISTRIBUTION

1. Reference Letter, DALO-PLO, HQDA, 30 September 1981, subject: Study of Army Logistics - 1981, with attached study.
2. The above reference forwarded the Study of Army Logistics - 1981 to addressees. That study was prepared by an independent study group at the direction of the Chief of Staff, United States Army. Detailed background information concerning origins and conduct of the study are within Section 28 of the study.
3. Following publication of the study, the Army Staff, assisted as required by Major Army Commands, conducted an assessment of its contents. This assessment is published in three volumes, and is designed for use as a companion document to the initial study.
 - a. Volume I (Forwarding Letter, Assessment Methodology, and Assessment Matrix).
 - b. Volume II (Unclassified Assessments).
 - c. Volume III (Classified Assessments).

STUDY BACKGROUND, ASSESSMENT METHODOLOGY AND ASSESSMENT RESULTS

1. Study Background:

a. → The Commander, Department of the Army Materiel Development and Readiness Command (DARCOM), was tasked by the Chief of Staff, Army, to conduct the broad-scope study, not in his capacity as the DARCOM commander, but rather as a senior Army logistician.

b. Study group members were drawn from within DARCOM, and were augmented from other commands and the Army Staff. As required, input was obtained from the Army Staff, Major Army Commands, other studies, and allied nations. ←

c. On 30 August 1981, the study group briefed study results to the Chief of Staff, Army. The study was subsequently distributed to attendees of the 1981 Commanders' Conference. The Office of the Deputy Chief of Staff for Logistics, Headquarters, Department of the Army, was assigned as lead agency to conduct the Army's assessment of the study and determine which recommendations were suitable for adoption.

2. Study Overview: The basic study is arranged within twenty-eight volumes and contains two-hundred seventy-five recommendations. The format for the study is a narrative on slides.

3. Study Assessment Methodology:

a. A full-time assessment coordination office was established within the Office of the Deputy Chief of Staff for Logistics, Headquarters, Department of the Army.

b. The basic study was reviewed, and a listing of all recommendations prepared.

(1) Key recommendations within Section 28 of the study were extracted directly, and placed within an assessment Category I. Sub-recommendations from elsewhere within the study were extracted and aligned against these Category I recommendations where appropriate.

(2) Recommendations which remained were assigned an assessment Category of II.

c. Concurrently, the Office of the Deputy Chief of Staff for Operations and Plans examined Section 2 of the study, "Trends and Projections" and found statements and observations correct, thus validating key broad assumptions upon which the study was based.

d. Each recommendation within the study was assigned to a proponent Army Staff agency lead office for the conduct of the assessment. This proponent analyzed the recommendation, and provided the Director of the Army Staff (DAS) an assessment concerning the suitability of adopting the recommendation.

(1) Information memoranda were submitted to the DAS if action to adopt a recommendation was either ongoing or could and would be initiated by the assessment proponent.

(2) Decision memoranda were submitted to the DAS if the recommendation required a decision by the Director of the Army Staff before it could be adopted or, if the recommendation was determined to be not suitable for adoption.

e. Memoranda were submitted by assessment proponents in accordance with milestones established by them.

f. The matrix at Appendix A provides an executive summary of assessment results.

(1) The left column provides a paraphrased statement of the recommendation, and the Army staff office responsible for the conduct of the assessment. Any requests for additional information concerning the assessment of the recommendation should be submitted directly to that office.

(2) The center column indicates the implementation status for the recommendation. "Implemented" indicates that the action of the recommendation is event-oriented, and has been accomplished. "Continuing" is entered if the recommendation is more goal-oriented, and implementation is ongoing. "Assessment ongoing," and "not adopted" entries are self-explanatory.

(3) The right column indicates the assessment report volume within which a more detailed assessment of the recommendation may be found. Also indicated is follow-up action to be taken with regard to the recommendations.

(a) "Assessment Memorandum to Director Army Staff (DAS) July 1983" is entered if long lead-times required have precluded a full assessment of the recommendation to be completed at the date this report was published.

(b) "Information Status Memorandum to the Director of the Army Staff - July 1983," is entered for those significant actions where a subsequent update is warranted.

(c) "Tracked through the Army Logistics Assessment (ALA)" is entered if that HQDA ODCSLOG office will track implementation of the recommendation.

(d) "Tracked by Proponent" indicates that no further reporting on the recommendation will be required, but that status as required, will be available from proponent offices.

(e) "Not Tracked Further" is entered where recommendations were not adopted.

4. Statistical results of assessment:

a. Recommendations adopted in whole or as modified - two hundred thirty seven.

- b. Recommendations not adopted or adopted only in part. Twenty-one.
- c. Recommendations addressed separately by HQ DARCOM - Nine.
- d. Recommendations still being assessed - Eight.
